

MISSION

To improve the quality of education for all Indiana students.

VISION

A K-12 education system that provides quality education options for every Indiana student and a statewide network advocating for education policies that benefit children.

SCHOOLS & COMMUNITIES

The quality of instruction is far more important than the school model. We support all types of schools by celebrating academic successes and connecting struggling schools with the resources and strategies they need to improve. IQE also provides information and resources on school accountability metrics and policy implementation.

STUDENTS & FAMILIES

IQE empowers parents to choose the education that best fits their child's needs. Our outreach team supports families navigating their school choice options by providing honest information about how schools are performing. If families can't afford the school of their choice, we direct them to programs that can help pay for tuition. IQE is one of four scholarship granting organizations in Indiana. Through the support of generous donations, we are able to partner with schools to provide tax credit scholarships to eligible students.

POLICY

We support student-centered policies that improve the quality of education for all children, whether they attend a traditional public school, public charter school, or private school. Our organization operates under four main pillars: recognizing and rewarding great teachers, equitable funding for all schools, and strong accountability for student learning, and quality options for all.

WE ADVOCATE FOR

STRONG ACCOUNTABILITY THAT IS FAIR AND TRANSPARENT

School accountability allows everyone to understand how well a school is preparing students and empowers parents, educators and community members to work together to improve educational opportunities for all students.

QUALITY EDUCATION OPTIONS FOR ALL FAMILIES

Quality, world-class educational opportunities should be available to all Hoosier students, whether in the public or private school systems.

RECOGNIZING AND REWARDING GREAT TEACHING

Nothing we can do for our students matters more than giving them effective teachers. To improve education for all students we must start by making sure great teaching is happening in every classroom.

MORE EQUITABLE FUNDING

Our children deserve an education that is funded equally no matter what type of school they choose to attend.
